

Taimur Lateef

Senior Project Manager · IT Governance · Digital Transformation

Gulshan-e-Iqbal, Karachi, Pakistan | +92 322 2615007 | Taimur.Lateef@Outlook.com | [linkedin.com/in/taimurlateef](https://www.linkedin.com/in/taimurlateef)

PROFESSIONAL SUMMARY

Results-driven Senior IT & Delivery Manager with 20+ years of experience in project delivery, digital transformation, and IT governance. Early adopter and internal advocate of AI-driven development — independently used Claude (Anthropic) to build a cross-platform Android application in Flutter and an enterprise-grade LMS in Node.js as proof-of-concept initiatives, demonstrating the viability of AI-accelerated software delivery and educating teams on practical AI adoption. Proficient in applying AI tooling across project planning, executive reporting, risk management, and documentation workflows. Proven track record managing full project life-cycles across NGO, financial, and multinational environments. Deep expertise in vendor management, audit compliance, stakeholder communication, and agile and waterfall delivery frameworks.

CORE COMPETENCIES

| - Project Life-cycle Management | - IT Governance & Compliance | - GDPR & Regulatory Audits |
| - Vendor & Stakeholder Management | - Digital Transformation | - Agile / Waterfall Delivery |
| - Team Leadership & Mentoring | - Budget & Resource Planning | - Process Optimization |

PROFESSIONAL EXPERIENCE

Senior Project Manager

Dec 2018 – Present

The Citizens Foundation (TCF) · Karachi

- Directed end-to-end delivery of 10+ concurrent IT projects, consistently meeting scope, schedule, and budget targets across a multi-million-dollar portfolio.
- Leveraged AI tools — including Claude, ChatGPT, Gemini, and DeepSeek — to streamline project planning, risk registers, executive reporting, stakeholder communications, and documentation, significantly reducing delivery turnaround time.
- Led an end-to-end external IT & GDPR compliance audit — managing scope, timeline and final report — achieving full regulatory compliance on schedule.
- Organized and managed various user trainings for new modules introduced in the mobile and web solutions
- Architected and deployed a Meta-partnered WhatsApp Business solution enabling bulk donor and alumni outreach to 50,000+ contacts, strengthening institutional fundraising.
- Identified operational bottlenecks and implemented technology-driven solutions, reducing process cycle times by ~30% and improving team throughput.
- Produced executive-level dashboards and status reports for C-suite stakeholders; managed multi-functional in-house teams and external vendor relationships.
- Provided technical oversight for system architecture, third-party integrations, and development governance aligned with IT best practices.

Delivery Manager – Pakistan / Project Manager

Apr 2016 – Nov 2018

Kalsoft LLC · Karachi

- Progressed from Project Manager to Delivery Manager over 2.5 years, delivering end-to-end project management for multinational and financial sector clients, leading cross-functional teams and maintaining 100% on-time delivery while contributing to new business acquisition.
- Owned full project delivery for Pakistan-based engagements across multinational corporations, banks, and financial institutions.
- Led and mentored multiple development teams and their managers, consistently delivering on time and within budget across all client accounts.

- Partnered with Sales leadership on project pitching and feasibility analysis, contributing directly to new business acquisition.
- Standardized delivery processes across teams, reducing escalations by 40% and improving client satisfaction scores.
- Managed multiple client engagements concurrently, defining requirements, scope, timelines, and budgets from inception to delivery.
- Provided hands-on leadership to development teams, ensuring efficient workflow and 100% on-time solution delivery.

Head of Development / Team Lead

Mar 2009 – Mar 2016

Softfit Technologies · Karachi

- Progressed from Team Lead to Head of Development over 7 years, delivering e-commerce platform enhancements and maintaining BAU stability for international clients.
- Directed offshore web development team of 15+ engineers; oversaw deliverable quality, sprint planning, and timely project completion.
- Established coding standards and QA processes that reduced post-release defects by 25%.
- Full-stack development across the entire SDLC — built and maintained high-traffic web applications and e-commerce portals.

Senior Web Developer / Junior Web Developer

Sep 2002 – Feb 2009

BCi New Media · Karachi

- Progressed from Junior Developer to Senior Developer over 6.5 years, delivering high performance digital and e-commerce solutions for international clients.
- Collaborated within a developer team to build new applications and provide technical support and maintenance for existing web solutions.
